A MORE RELIABLE
HIGH-QUALITY PRINTING AND DIE-CUTTING
TOTAL SOLUTION PROVIDER

PREFACE

Since its establishment in 1978, Gaoqi has always adhered to the core philosophy of "Innovation-Driven, Customer-Focused, High Integrity, Vibrant Life," providing customers worldwide with outstanding functional components such as special printing and precision die-cutting. Today, our services cover various sectors including smartphones, computers and peripherals, network communication terminals, automotive industry, medical devices, smart homes, energy storage, electric tools and toys, data and cloud computing, making us an industry leader.

The name Gaoqi is not just our brand, but also a manifestation of our corporate culture. "Gao" represents our pursuit of excellence in various dimensions. It's not just about technology and product quality; we also strive to be industry-leading in terms of service, management, and innovation. We always hold ourselves to the highest standards, continuously improving quality and service to exceed customer expectations. Meanwhile, we integrate various advanced technologies and concepts to provide comprehensive solutions, helping customers stand out in the fierce market competition.

"Qi" symbolizes our diversity and creativity. Through our colorful products and services, we offer customers a rich variety of high-quality choices; through our imaginative ideas, we demonstrate our innovative spirit in exploring new technologies and markets; through our aspirations, we express our vision for a better future, firmly believing that through continuous innovation and unremitting efforts, we can achieve an even brighter future.

In the context of globalization and rapid technological development, Gaoqi Technology always maintains a keen market insight and strong R&D capabilities to meet the ever-changing needs of customers. Looking ahead, we will continue to be customer-focused, uphold the principles of high standards, high dimensions, and high integration, constantly pushing the boundaries of innovation and enhancing product and service quality. We look forward to joining hands with our partners to embrace new challenges and opportunities together and embrace a brighter future.

We are grateful for your trust and support!

GROUP PROFILE

Originating from the establishment of Gaoqi Special Printing Co., Ltd. in Taiwan in 1978, we invested in setting up a factory in Dalingshan, Dongguan, Guangdong Province in 1995, and fully transformed into a private high-tech enterprise in 2014. We are a leading domestic high-quality printing and precision die-cutting system service provider. We have 6 subsidiaries and production bases worldwide, with over 500 employees, and our R&D and production bases cover a total area of over 30,000 square meters. Our products are sold to over 50 countries and regions globally.

With stable product quality and excellent service, we have won the trust and cooperation of multiple Fortune 500 brand customers worldwide since our establishment, providing one-stop high-quality full-scenario solutions. Our business covers various industrial sectors including smartphones, computers and peripherals, network communication terminals, automotive industry, medical devices, smart homes, energy storage, electric tools and toys, data and cloud computing, among others.

高绮科技 GAOQI

1978-2025

DEVELOPMENT HISTORY

1978
Taiwan Gaoqi was officially established

1995
Dongguan Gaoqi was established to exploit the Chinese mainland market

1998
Obtained multiple international certifications such as ISO9001, entering the stage of standardized management

2002-2004
Awarded Sony GP, Ricoh CMS, Flex, and ASUS green certifications

2005-2010
Awarded Sony Excellent Supplier, becoming a global strategic partner

Received certificates of appreciation from Sony and Towada

Ranked among the Top 50 Printing Companies in South China

2011-2012
Became an advanced enterprise and major taxpayer at Dalingshan Town, Dongguan

Recognized as an enterprise with harmonious labor relations

2014
Transformed into a private high-tech enterprise

Established Hong Kong Gaoqi

Awarded Skyworth's Excellent Supplier and established a "Joint Innovation Laboratory"

2017
Awarded National High-tech Enterprise certification

Obtained IATF16949 and QC080000 certifications, laying the foundation for global competitiveness

2018
Established Guangdong Gaoqi Technology and Songshan Lake R&D Headquarters, promoting R&D and innovation

2019
Awarded as Fast Growing Enterprise and major taxpayer at Dalingshan Town, Dongguan

Recognized as a Collaborative Fast Growing Enterprise in Dongguan

2020
Upgraded to a Fast Growing Enterprise in Dongguan

2021
Applied for a provincial engineering center

Recognized as a trustworthy and contract-abiding enterprise

Established cooperation with Dongguan University of Technology and Guangdong Medical University

2022
Awarded the title of "Outstanding Excellent Supplier" by Oracle

Recognized as an Excellent Partner by Sunwoda

Ranked among the top five in the industry nationwide and second in Guangdong's electronic label industry

An Excellent Organization Introducing Performance Management, Municipal Engineering Technology Research Center for Smart Special Printing and Precision Die-cutting, AAA Measurement Management System Certification

Awarded the title of "Guangdong Specialized, Refined, Differential and Innovative Enterprise"

Guangdong Gaoqi was recognized as a "National High-tech Enterprise"

2023
Awarded "Gold Supplier" by Foxconn

Established Dongguan Industrial Design Center

Recognized as a vocational skill certification enterprise in Dongguan

2024
Awarded the title of "Strategic Partner" by Oracle

Won a Gold Award in the "ADA Cup" Label Awards

Established Gaoqi Singapore

Established Gaoqi Vietnam, which was officially put into production, obtaining ISO9001 and 14001 certifications

2025
Awarded Excellent Supplier by Scud

Certified to ISO22301

Gaoqi Vietnam passed on-site audits by renowned clients such as Oracle, Foxconn, Anker, Luxshare, and BYD

ACTIVITIES

PUBLIC WELFARE

We fulfill our social responsibilities with practical actions, contributing to society. Every effort we make is an expectation for a better future; every contribution we make is a commitment to social responsibility.

02
STRENGTH

SMART MANUFACTURING

With advanced intelligent manufacturing technology, we provide efficient and precise production capabilities, covering precision screen printing, precision die-cutting, trademarks, anti-counterfeiting, gold foil stamping and barcodes, rotary color printing, laser cutting and precision engraving, insulating sheets, EMI, gasket stamping and silicone/rubber products, optoelectronic, conductive and thermal, thermal insulation, and thermal dissipation material molding, LOGO identification and nameplates, decorative strips and panels, and other fields. Our intelligent manufacturing process not only ensures the consistency and excellence of product quality but also flexibly meets the customized needs of customers from various industries, helping them gain an advantage in the competitive market.

INTELLIGENT TECHNOLOGY

EFFICIENT SERVICE

EXCELLENT QUALITY

BRAND COMPETITIVENESS

01 More reliable product quality

02 More reliable system capabilities

What makes us more reliable?

03 More reliable service response

04 More reliable brand heritage

Precision Screen Printing

Plastics (PMMA/PC/PET/PP), paper (all types of self-adhesive labels), glass, metals (stainless steel, aluminum composite panel), circuit boards, gold foil stamping materials.

Rotary Printing, Trademarks, Barcodes

Materials are mainly adhesive labels, such as copperplate paper, synthetic paper, white PET, polyester film silver matt(I) sticker, polyester film silver matt(B) sticker, metalized polyester silver label, transparent PET.

CNC Engraving, Molding

Backplates, decorative strips, thick foam, screen-print molded products, embossed products, insulating sheets, glass fiber boards, precision engravings, etc.

Precision Die-Cutting

Easy-tear stickers, double-sided tapes, MYLAR, PORON, NOMEX, mesh, graphite sheets, copper foil, aluminum foil, protective films, conductive cloth, rubber pads, etc.

R&D
INNOVATION

We always take innovation as the core driving force for enterprise development. We have a research and development team of more than 50 senior engineers and technical experts who focus on the exploration and application of industry-leading technologies. Through continuous R&D investment and innovation, we have obtained dozens of patents and technological breakthroughs in the fields of high-quality printing and die-cutting. Moreover, our R&D center is equipped with advanced experimental equipment, dedicated to providing customers with the most competitive solutions and promoting technological progress in the industry.

SMARTPHONES

Gaoqi Technology provides comprehensive solutions for the smartphone industry, including labels, protective films, and functional components, addressing product differentiation, thermal management, and other issues. We offer high-precision tamper-evident labels, battery labels, and product labels to ensure brand presentation and information security. Through high-transparency, wear-resistant protective films and high-thermal-conductivity materials, we enhance the device's appearance protection and internal heat dissipation. With our one-stop solution, we quickly respond to market demands and support customers throughout the entire development process from design to mass production.

Product Labels
Our labels feature high precision, durability, and are waterproof, dustproof, and anti-counterfeiting, ensuring information identification and safety protection for smartphones in various environments.

Protective Films
Our protective films are characterized by high transparency, wear resistance, and scratch resistance, providing comprehensive screen protection for smartphones and extending the device's lifespan.

Functional Components
Our functional components are applied to phone top and bottom covers, lens covers, thermal dissipation, and electromagnetic shielding. Through high-precision die-cutting and innovative materials, they enhance thermal dissipation performance and stability.

Product Applications
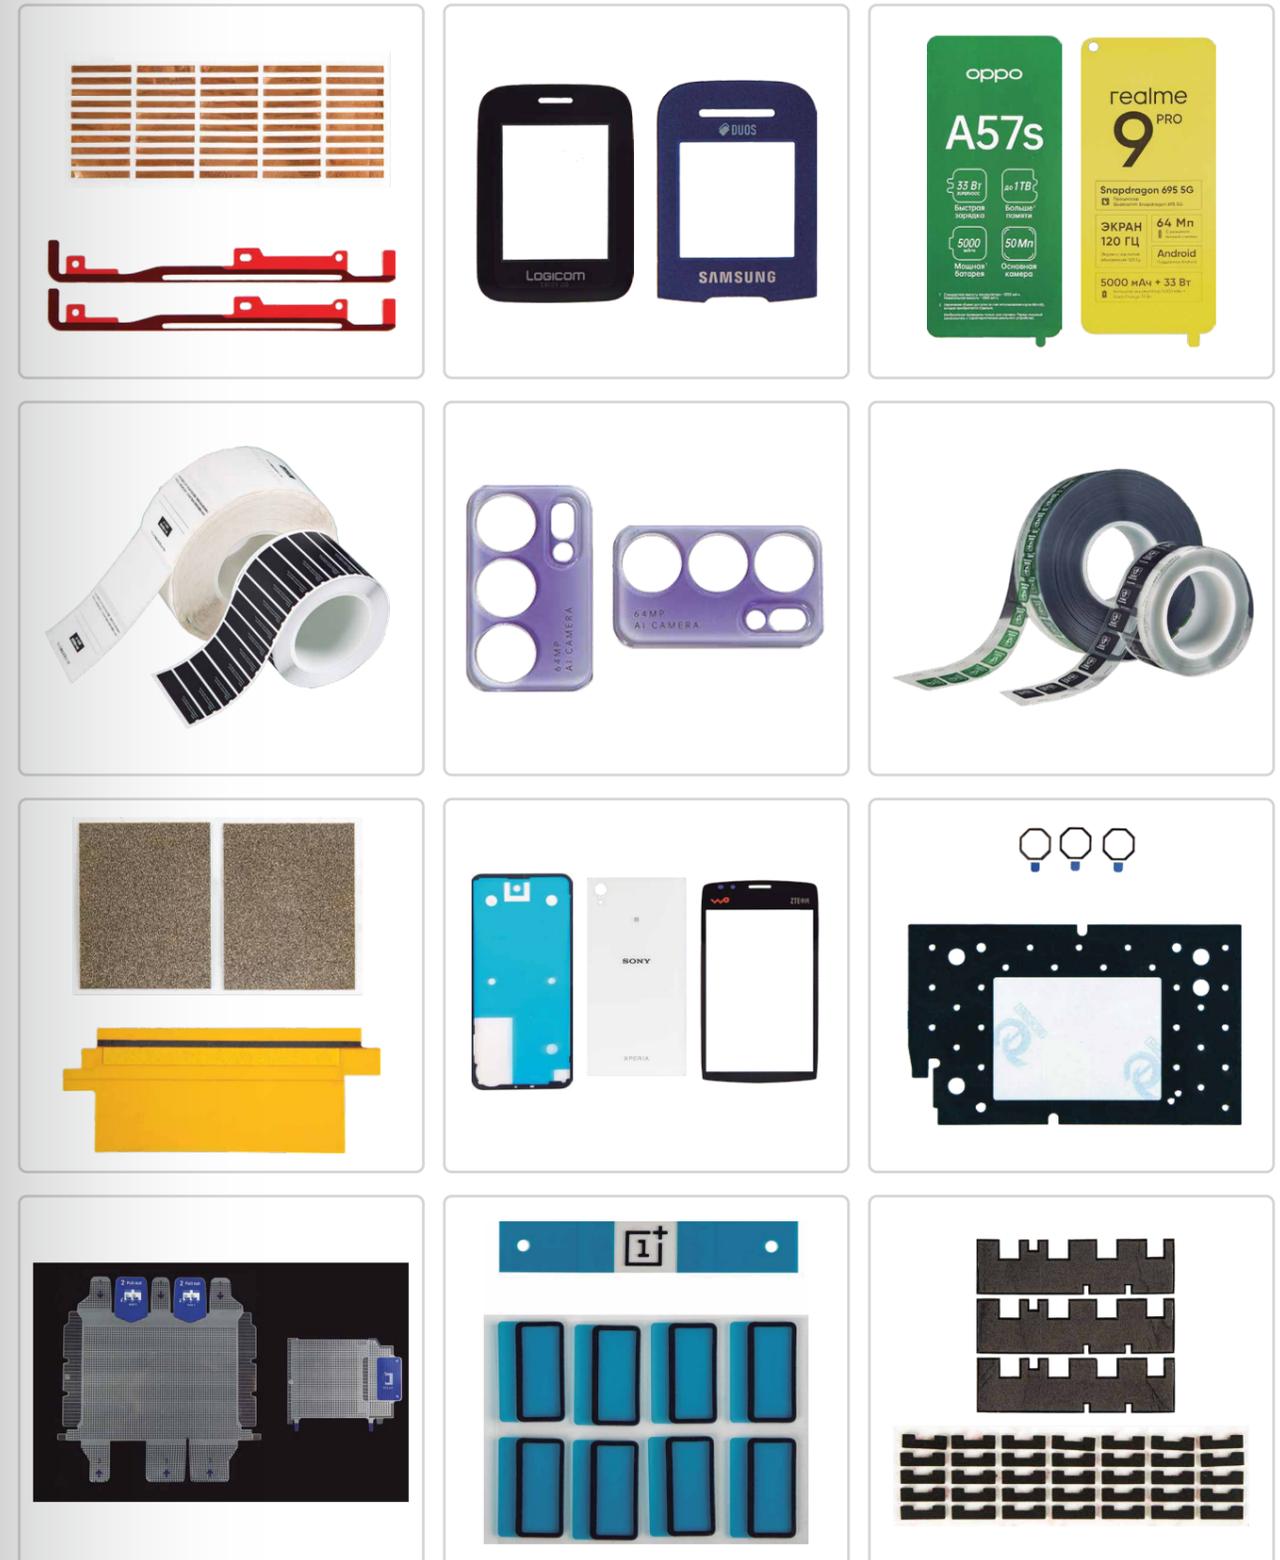

COMPUTERS AND PERIPHERALS

Addressing the long-term use and high-quality requirements of the computer and peripheral equipment market, Gaoqi Technology offers solutions for labels, protective films, and functional components. Our products include heat-resistant and waterproof computer labels, screen protective films, light guides, and thermal pads, ensuring device durability and stability across various scenarios. With our efficient supply chain and advanced manufacturing technology, we help customers achieve one-stop services from design to production, meeting the market's rapid delivery needs.

Product Labels

Our labels are heat-resistant, wear-resistant, and tear-resistant, ensuring clear readability even after prolonged use.

Protective Films

The protective films we produce effectively protect device displays and casings from scratches and stains, and are easy to install and replace.

Functional Components

We provide functional components such as light guides, polarizers, and heat sinks, which play a key role in computer display technology and thermal management, significantly enhancing device performance and user experience.

Product Applications

高绮科技
GAOQI

NETWORK COMMUNICATION TERMINALS

Gaoqi Technology provides full-scenario solutions for labels, protective films, and precision structural components for the network communication terminal industry, addressing customer pain points in device identification, durability, and thermal management. We offer high-precision product labels, high-temperature-resistant protective films, as well as server panels, conductive foam, and other functional components, ensuring stable device operation in harsh environments. Through innovative material applications and precision manufacturing, we help customers achieve efficient product development and deployment.

Product Labels

Our labels are widely used in network communication terminals, featuring high-precision printing and strong durability, suitable for the identification needs of various network devices.

Protective Films

We provide optic fiber protective films and other products for network communication terminals, which are highly durable and UV-resistant, effectively protecting optic fiber and other critical components.

Functional Components

We offer high-quality functional components such as screen panels, touch panels, silicone, foam, insulation sheets, etc., to enhance the durability and functionality of equipment, ensuring stable operation of network devices in various environments.

Product Applications
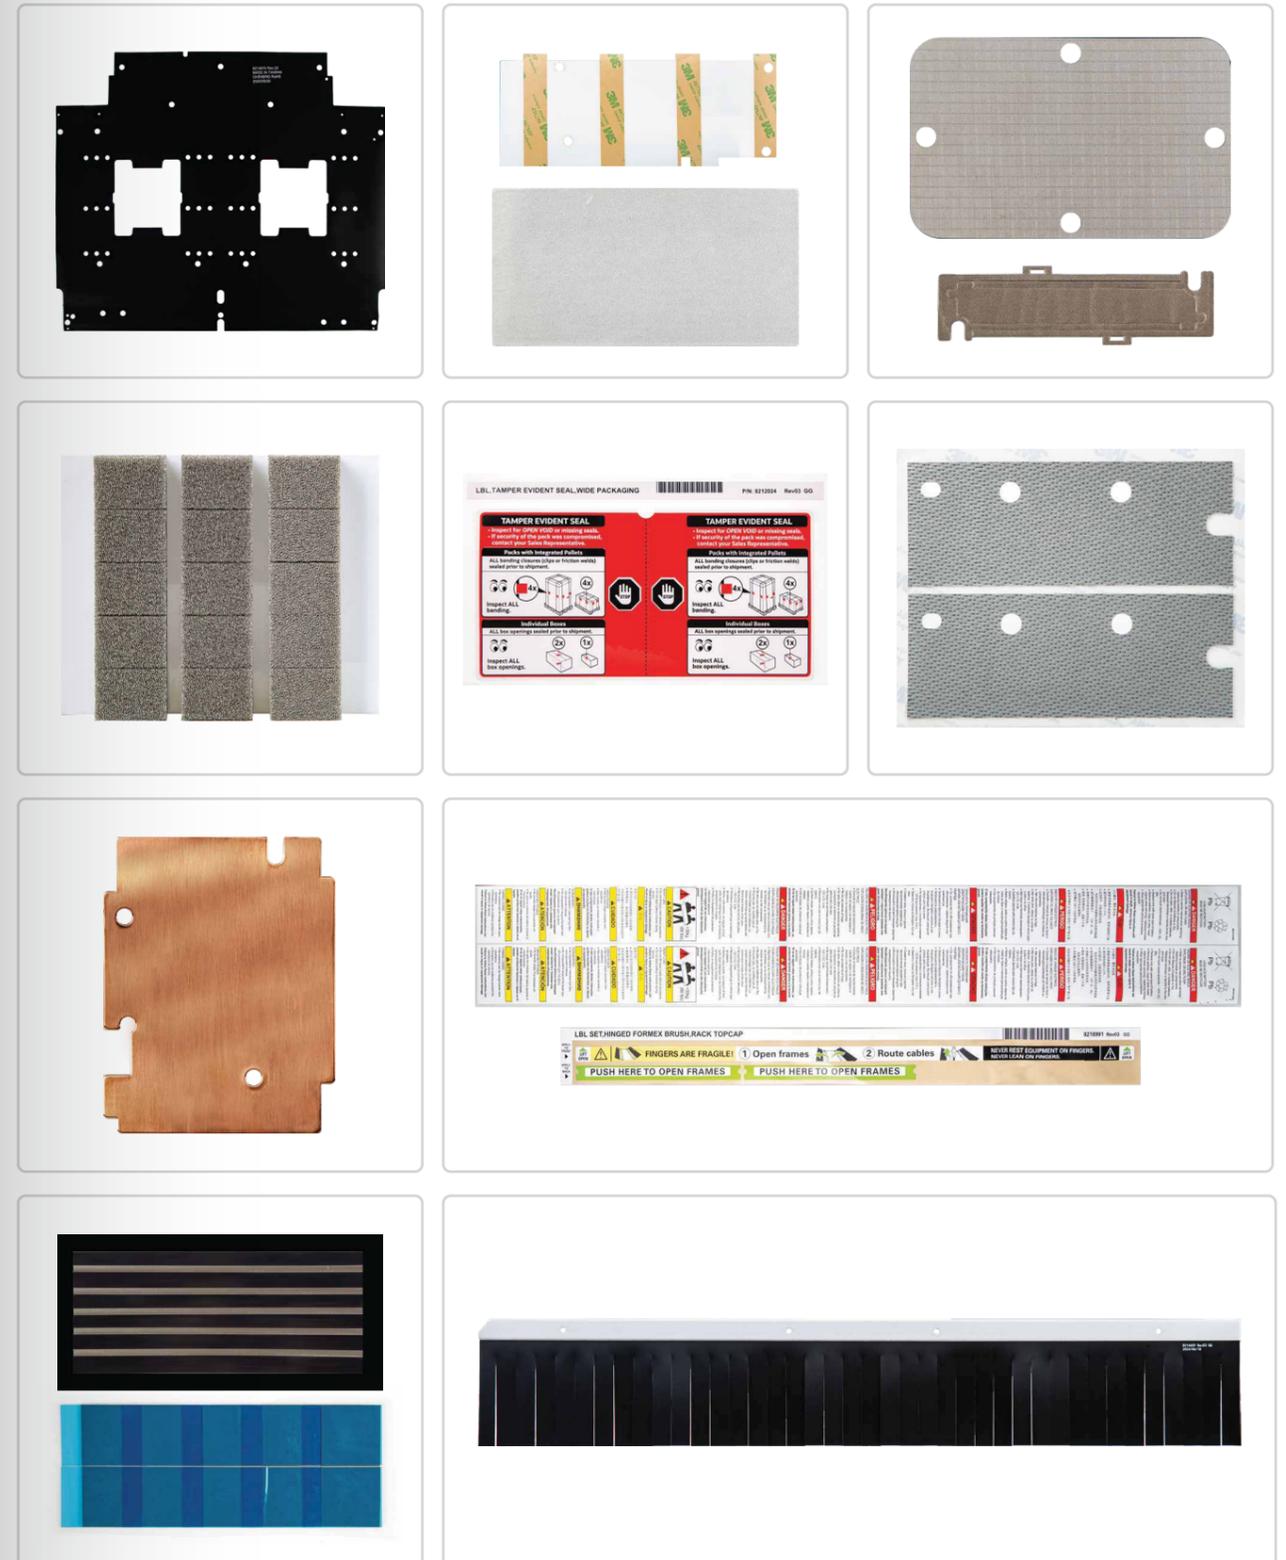

AUTOMOTIVE INDUSTRY

Faced with the automotive industry's high requirements for safety, durability, and aesthetics, Gaoqi Technology offers comprehensive solutions for labels, interior components, and functional structural parts. Our high-temperature-resistant labels, instrument panels, center console panels, soundproofing materials, and other products address challenges in information identification, interior aesthetics, and in-car comfort. With advanced processes and strict quality control, we provide customers with one-stop support from design to mass production, facilitating the efficient launch of automotive products.

Product Labels

We provide various labels for automotive components, such as hot-melt labels, sunshade labels, and energy efficiency labels. These labels are heat-resistant, waterproof, and UV-resistant, ensuring excellent performance even in harsh environments.

Interior Components

Our interior components include central control panels, instrument clusters, and automotive central control glass, adopting advanced processing techniques and high-quality materials to provide a high-end aesthetic and comfortable experience for automotive interiors.

Functional Components

Our functional components such as shock-absorbing and cushioning accessories, seals, light-enhancing sheets, reflective sheets, and soundproof materials enhance the safety and comfort of vehicles, effectively improving the driving experience.

Product Applications
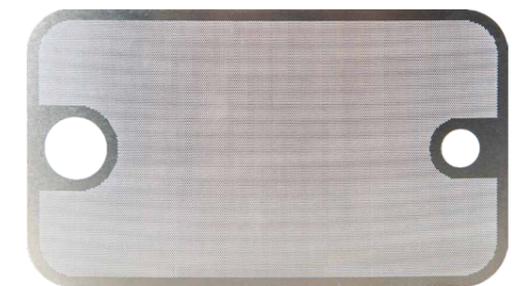

MEDICAL DEVICES

Gaoqi Technology provides comprehensive solutions for labels, medical consumables, and functional structural parts for the medical device industry, addressing customer pain points in product safety, durability, and information identification. We offer vascular labels, device enclosures, functional membrane sheets, and other products that meet medical standards, ensuring device reliability in harsh environments. Through innovative materials and manufacturing technologies, we help customers achieve efficient medical device production and strict quality control.

Product Labels

We provide temperature control labels, blood vessel labels, identification labels, and instructional labels for medical devices, which are waterproof, oil-resistant, and stain-resistant, ensuring long-term reliable use in medical environments.

Medical Consumables

Our medical consumables, including test reagents and non-woven fabric patches, are made from high-quality materials and advanced production processes to ensure product safety and effectiveness, complying with the strict standards of the medical industry.

Functional Components

Our precision components such as device casings, functional films, and optical lens mirrors are mainly used in the casings and internal components of medical equipment to ensure durability and precision.

Product Applications
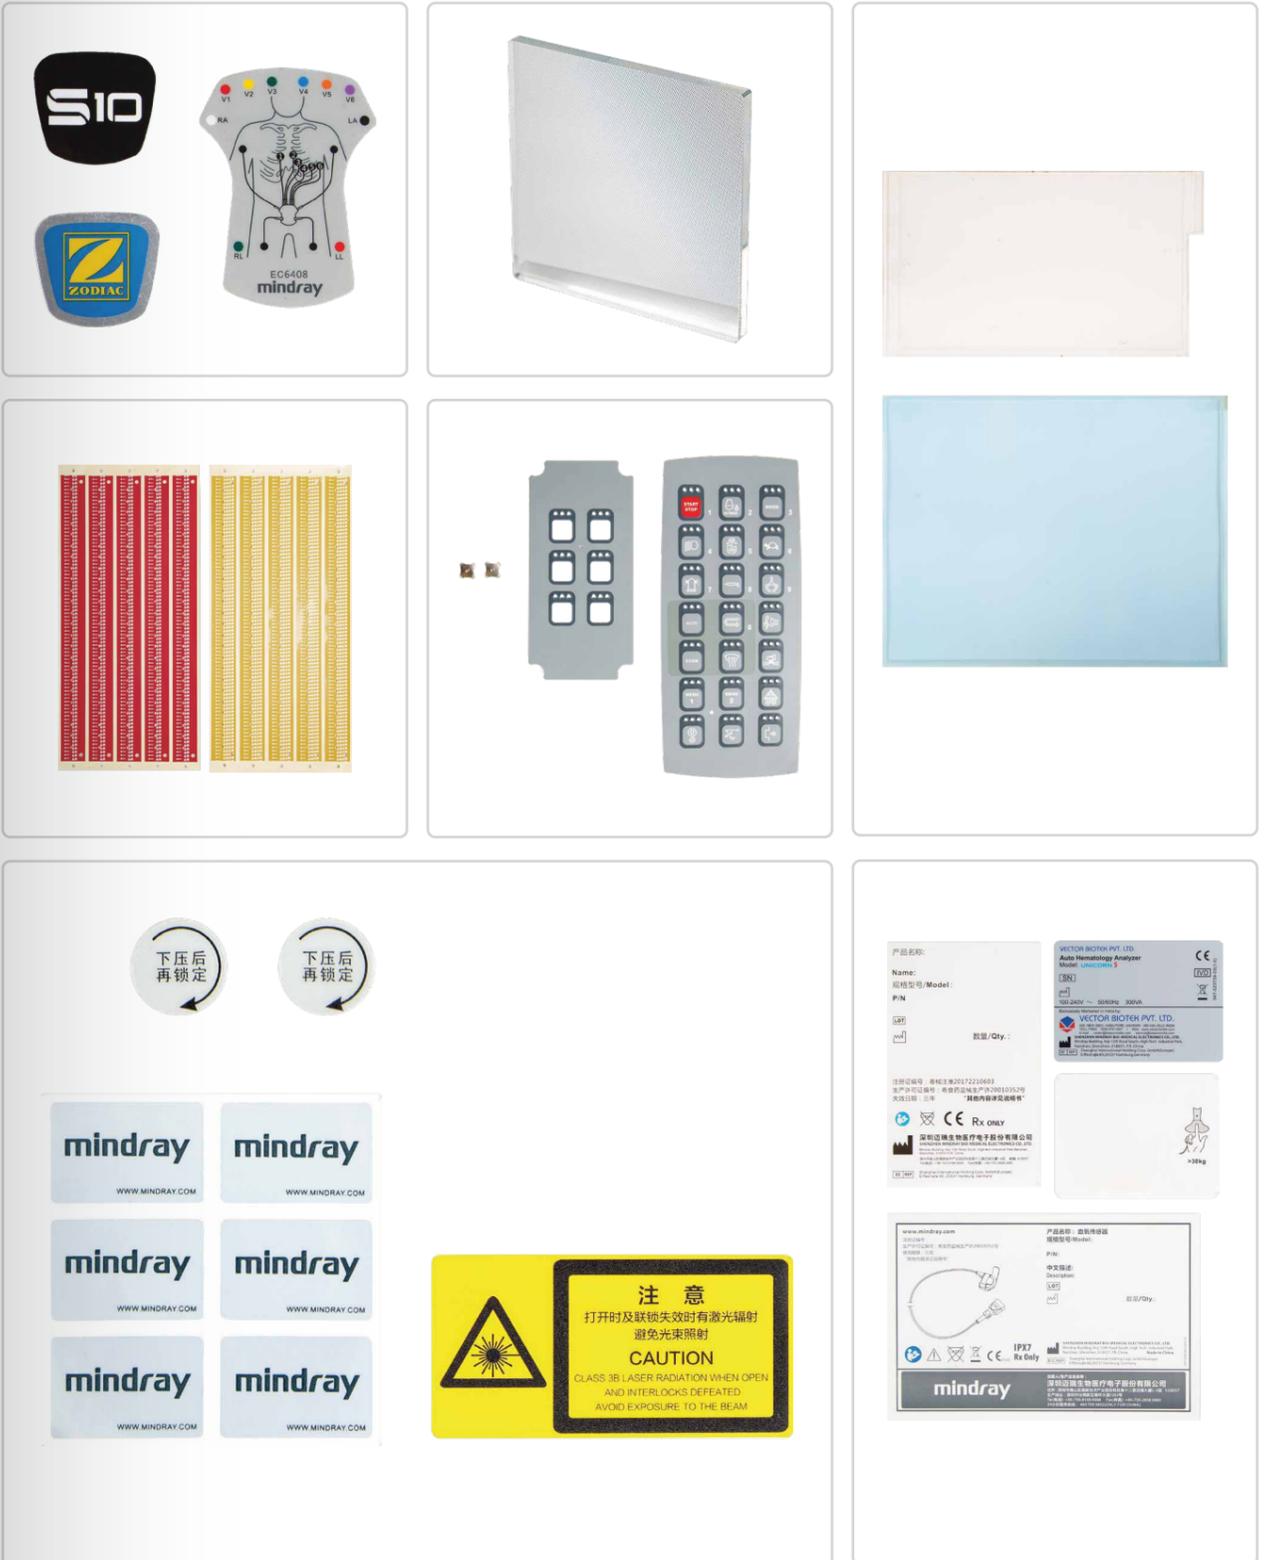

SMART HOMES

Gaoqi is committed to providing full-scenario solutions for labels, panels, decorative components, and functional structural parts for the smart home industry, addressing customer pain points in product aesthetics, durability, and brand presentation. Our energy efficiency labels, home appliance control panels, TV decorative glass, and other products enhance the appearance and functionality of devices. With full support from design and development to mass production and delivery, we help customers quickly respond to market demands and create outstanding smart home products.

Product Labels

Our energy efficiency labels, warning labels, and color labels have good adhesion and durability, and are widely used in various smart home devices to provide clear identification of product information.

Panels and Decorative Components

We offer home appliance control panels, TV decorative strips, and display panel screens with excellent appearance and durability to enhance the overall aesthetics and user experience of our customers' smart home products.
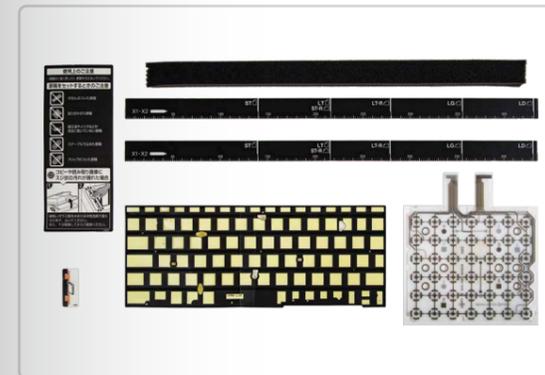

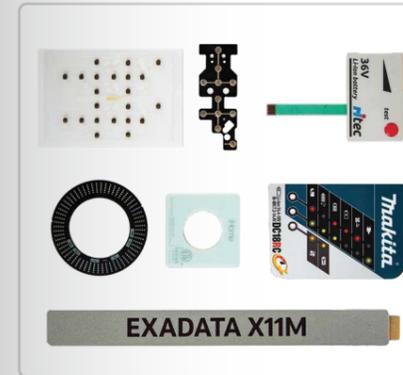

Functional Components

Our aluminum-plastic backplates, LOGO nameplates, insulation sheets, and TV decorative glass, through precision die-cutting and advanced processes, can provide customers with higher quality and functionality, meeting the diverse needs of the smart home market.

Product Applications

EXADATA X11M
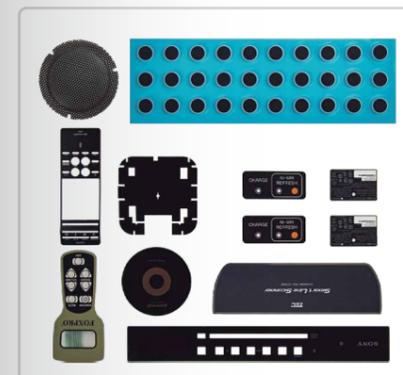

ENERGY STORAGE

In the field of energy storage, Gaoqi Technology provides customers with comprehensive solutions for functional structural parts, thermal materials, and protective films, addressing customer pain points in equipment safety, thermal management, and durability. Our battery covers, thermal insulation products, and protective films ensure efficient heat dissipation and stable operation of the equipment. Through one-stop solutions, we assist customers in rapidly advancing from R&D to production, ensuring that their products stand out in a competitive market.

Thermal Conduction and Insulation

Our thermal conduction and insulation products, such as ceramic silicone, aerogel, and foamed silicone, exhibit excellent thermal conductivity and insulation properties. They are suitable for thermal management systems in energy storage devices, ensuring stable temperatures during high-efficiency operation.
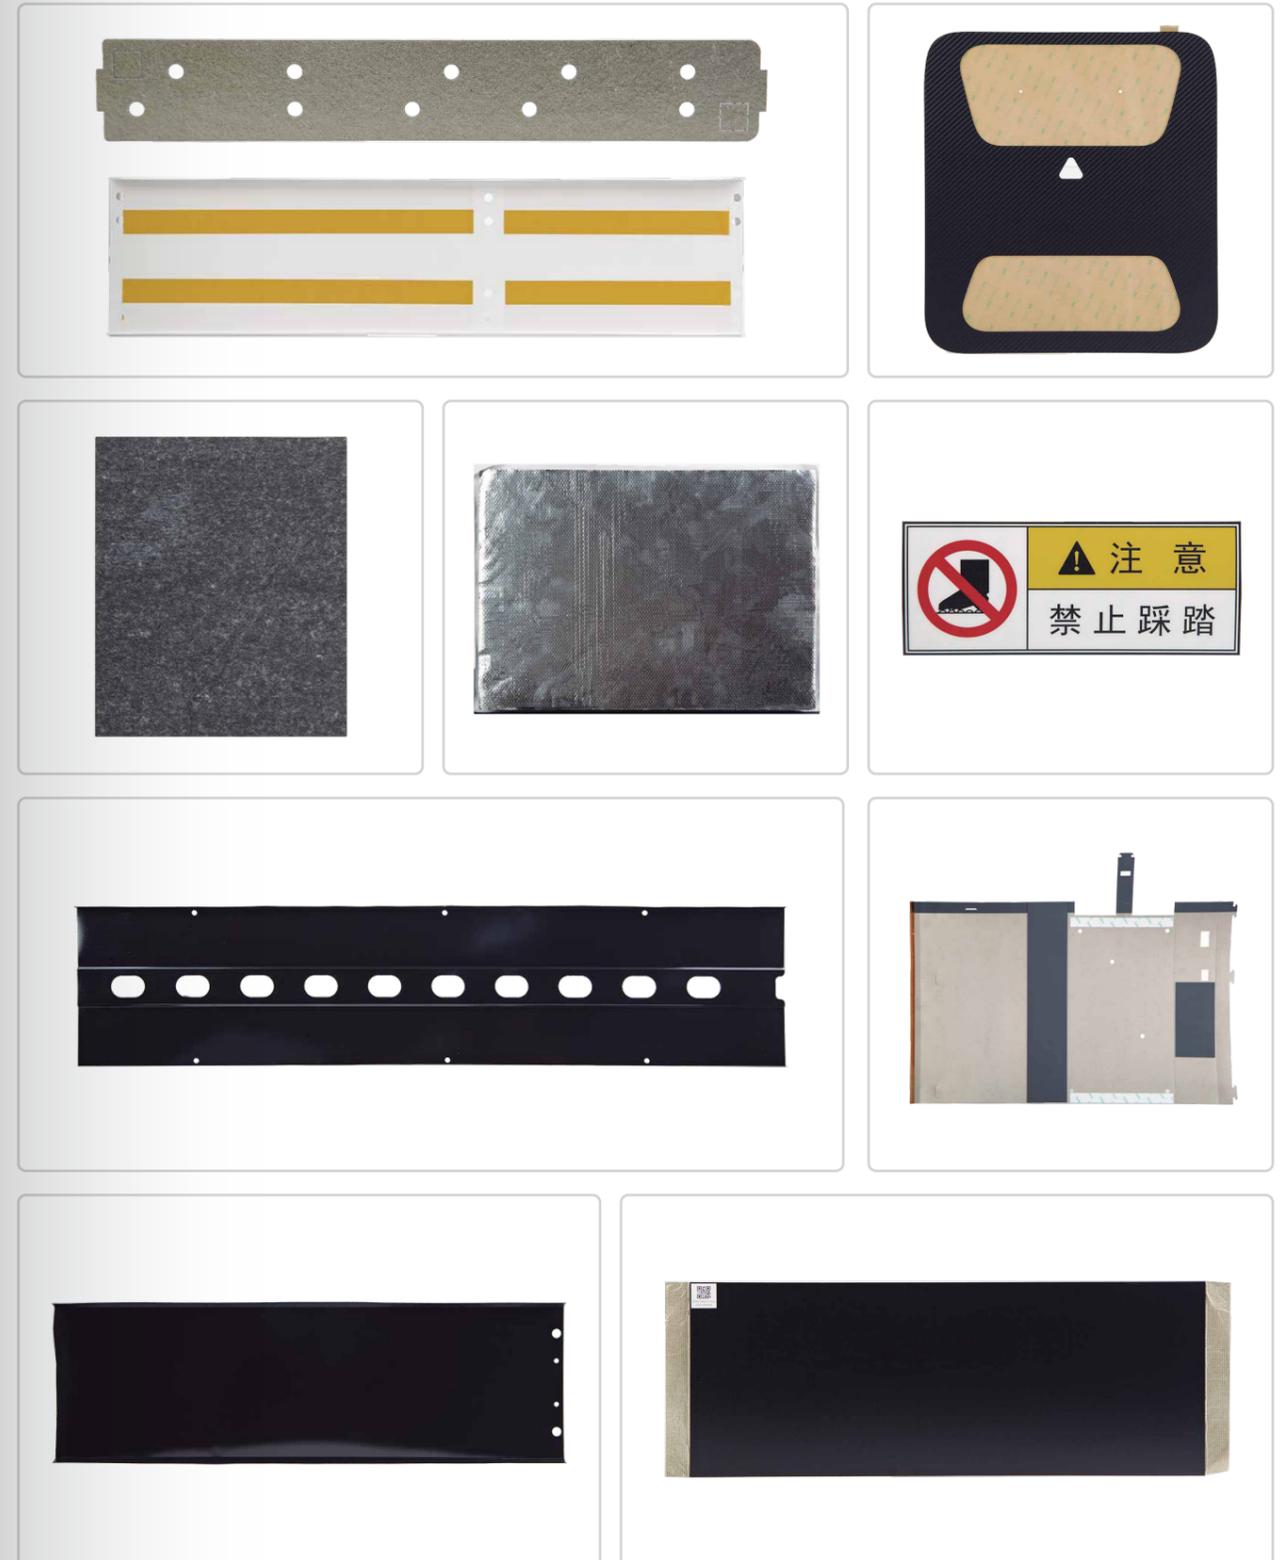

Functional Components

We provide upper and lower covers for energy storage batteries, insulating sheets, mica sheets, glass fiber boards, silicone rubber pads, etc. These products mainly use high-strength materials and precision processing techniques to ensure safety and stability for customers' energy storage devices.
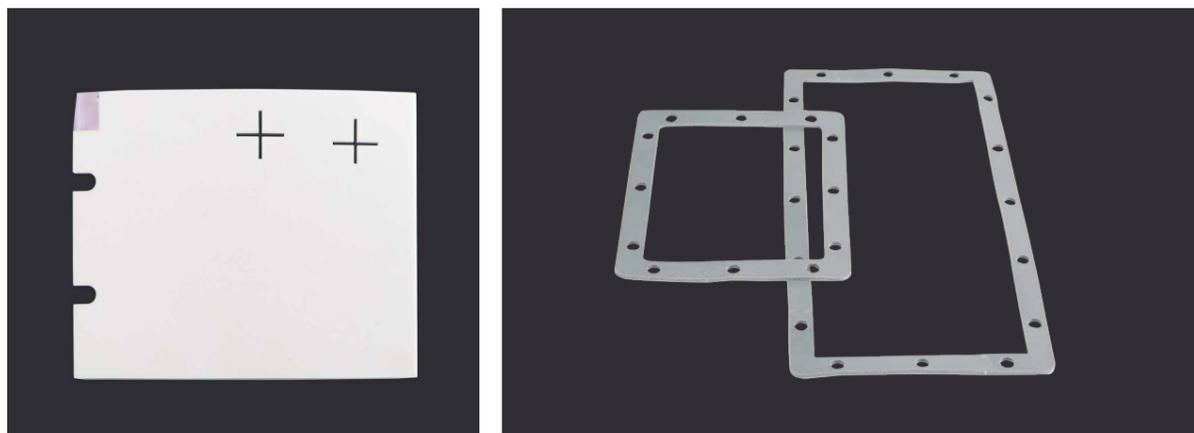

Product Applications

ELECTRIC TOOLS AND TOYS

Gaoqi Technology offers durable and waterproof labels and high-precision structural parts for the electric tool and toy industry, ensuring that product information remains clearly visible in various usage environments and significantly enhancing the overall quality and market competitiveness of the products. Through excellent precision manufacturing processes, our solutions help customers optimize product performance, achieving higher safety and aesthetics.

Product Labels

We provide body decorative labels, UL labels, and safety warning labels for electric tools and toys. These labels are durable and waterproof, effectively ensuring long-term clear visibility of product information.
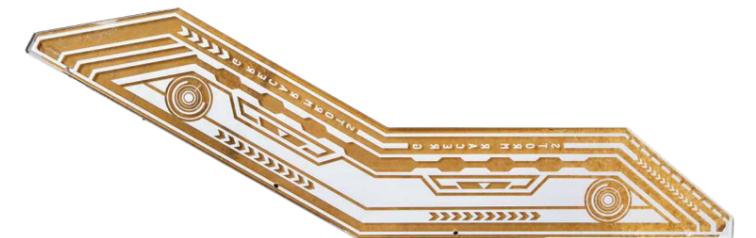

Functional Components

The body decorative panels and nameplates we provide have high precision and aesthetics. Through precision die-cutting technology, we ensure the stability of product quality.

Product Applications

DATA & CLOUD COMPUTING

For the data center and cloud computing industries, Gaoqi Technology provides full-scenario solutions including nameplate labels, thermal materials, and insulating sheets, addressing customer pain points in device thermal management, information identification, and stability. Our labels, thermal silicone, and foam products ensure stable operation and information recognition of equipment in high-temperature environments. Through efficient supply chain management and rapid response, we provide customers with one-stop services from design to delivery, meeting the market demand for high-performance data center equipment.
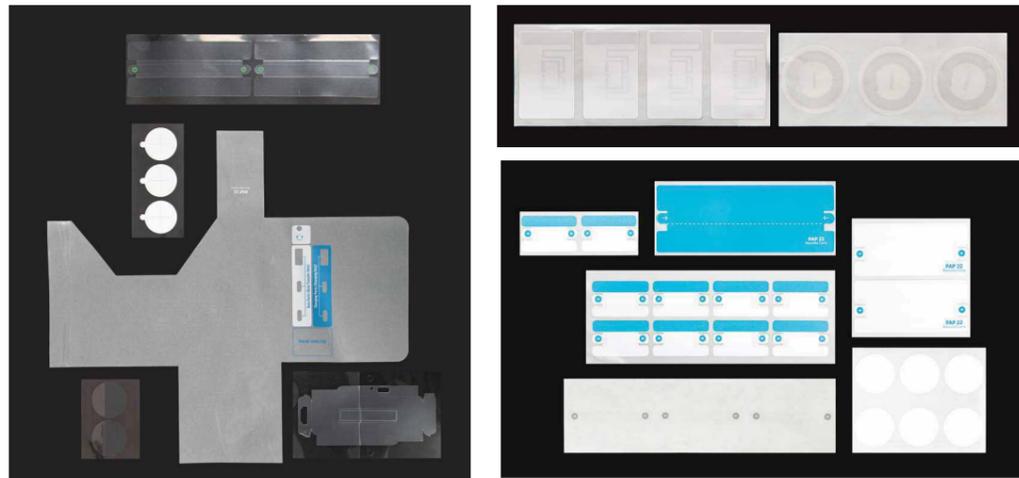

Product Labels

Our nameplate labels and indicator labels are widely used in data centers and cloud computing equipment. They have good durability and recognizability, ensuring the accuracy of customer equipment information.
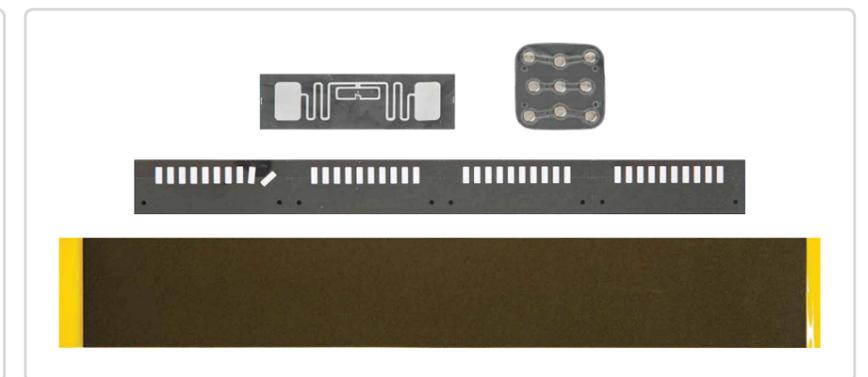

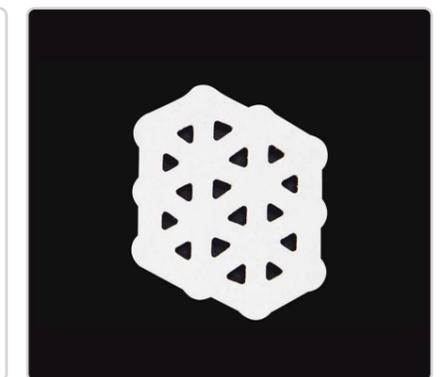

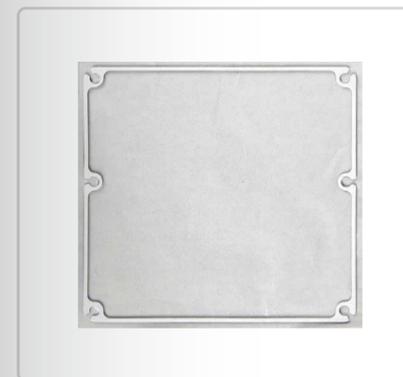

Thermal Conduction and Insulation

We provide functional components such as insulation sheets, foam products, and thermally conductive silicone for data centers, ensuring the safe operation and thermal dissipation of equipment.

高绮科技
GAOQI

OTHER INDUSTRIES

Gaoqi Technology also provides comprehensive solutions for labels, anti-counterfeiting technologies, and functional components for multiple industries such as logistics packaging, anti-counterfeiting tracking, daily chemicals, and consumer electronics, addressing challenges in product safety, information identification, and market competition. Our barcode labels, anti-counterfeiting labels, and food labels ensure accurate transmission of product information and consumer trust. Through innovative technology and flexible customization, we provide customers with efficient and reliable comprehensive solutions, helping them succeed in their respective industries.

Logistics and Packaging
We offer barcode labels, sealing labels, and tilt indicator labels for the logistics and packaging industry. These labels have good adhesion and protective properties, ensuring the safe transportation of packages.

Anti-counterfeiting and Tracking
Our anti-counterfeiting labels and RFID labels mainly adopt internationally advanced anti-counterfeiting technologies to help customers effectively prevent the circulation of counterfeit products.

Daily Chemicals and Food
Our household chemical labels and food labels are made of environment friendly materials and use high-precision printing processes to ensure accurate product information and food safety.

Consumer Electronics
We provide e-cigarette labels and thermally conductive die-cut components for consumer electronics. These products have good thermal conductivity and thermal dissipation properties to ensure the stable operation of related electronic consumer devices.

Temperature Control
Our temperature monitoring labels are suitable for various devices and scenarios that require temperature monitoring, ensuring that equipment operates within a safe temperature range.

CUSTOMER FIRST, SERVICE FOREMOST

We always adhere to the principle of "Customer First, Service Foremost", committed to providing customers with service experiences that exceed their expectations. By continuously optimizing service processes and improving response speeds, we ensure that customers can quickly resolve issues encountered. Wherever our customers may be, our service team will provide comprehensive support with the most professional attitude and fastest speed, ensuring smoother business development for customers.
